## A Message FROM OUR MANAGER

### Study Determines Rate Adjustment Necessary

At Rutherford EMC, providing members with safe, affordable, and reliable electricity is at the heart of everything we do. The challenge of making necessary improvements to our electric system while keeping the co-op financially stable can be difficult, but it is a challenge we must meet.

In the February News Line, Rutherford EMC announced the appointment of a third-party consultant to conduct a Cost of Service Study. The purpose of this study was to have an unbiased opinion on whether the cooperative's current electric rates were adequate. Rutherford EMC used an outside firm who specializes in analyzing financial data. Data included in the study reflects current and future projections of costs the cooperative will incur by maintaining and replacing power lines, poles, and other necessary equipment.

The results of the study indicate Rutherford EMC needs to adjust all rate classes. Residential electric rates were increased by an approximate average of 4.0%. The Basic Facilities Charge for residential rates will increase from \$17.50 to \$20.00 per month. The energy charge per kilowatt-hour (kWh) will increase from \$0.09339 per kWh to \$0.09875 per kWh, and the Wholesale Power Cost Adjustment (WPCA) will be reduced from \$0.003 per kWh to \$0.000. As a result, the average residential member consuming 1,150 kWh per month will see an increase of \$5.21 on their monthly electric bill. This adjustment will become effective on April 1, 2021.

For General Service and Large Power Consumers, fixed costs continue to be an increasingly larger part of total power costs. For this reason, in accordance with Rutherford EMC's Cost of Service Study, these consumers will see cost shifts from energy costs per kWh to the fixed cost portion of their bills. Basic Facilities Charges for General Service and Large Power Consumers will be \$27.00 for single phase, \$28.50 for three-phase, and \$60.00 respectively. These adjustments will also become effective on April 1, 2021.

Rutherford EMC was formed to meet the needs of you, our members. Meet-

ing those needs requires an ongoing capital investment and constant system maintenance. To be there when you need Rutherford EMC most, your cooperative must utilize a lot of equipment, technology, and people. While we understand that rate adjustments can have an impact on our family budgets (because many of us are members too), we want all our members to know this decision was not entered into lightly, especially, in the midst of a pandemic. The Board of Directors, executive staff, and every employee at Rutherford EMC exercise due diligence daily, striving to maintain the proper balance between the quality of service and the necessary funds required to provide those services.

To assist members in controlling their energy costs, your cooperative continues to provide energy-saving tips through our website [remc.com](http://remc.com) and through our monthly newsletter. Your cooperative also provides you individualized energy use information (only accessible by you) through our website and mobile app to help members better understand how and when they use electricity. You may also obtain a copy of your rate schedule at [remc.com](http://remc.com) or at your local Rutherford EMC office. By increasing your knowledge of energy usage patterns and costs, you are able to make better energy saving decisions.

Rutherford EMC is a not-for-profit electric utility. This means rates are not adjusted to generate profits. Rates are only adjusted when absolutely necessary to cover the cost of doing business. Electricity is still a great value when compared to other commodities, and no other commodity can singularly fuel as many daily conveniences as electricity.

As a long time cooperative employee and a fellow member, rate adjustments are not my desire. However, to maintain the high level of service our membership is accustomed to, and deserves; to maintain and upgrade facilities; and to remain current with new technology; the rate adjustment is necessary.

— S. Dirk Burleson

### How Does Covid-19 Affect Energy Usage?

Record unemployment numbers and overall economic uncertainty are forcing many Americans to pay closer attention at managing their monthly expenses. Traditionally, the electric bill is thought of as one of the toughest to manage. The electricity consumed is invisible, and the billing often happens a month after the usage. People only tend to think of electricity when the lights are out or their monthly bill comes in and it is higher than expected. However, that invisible electricity is the fuel that powers the critical aspects of our daily lives. During these unpredictable times, Covid-19 has caused many

people to be stationary and even many are currently working from home. These unforeseen changes along with many children currently engaged in remote learning situations forces residential energy usage at home to increase. How much the energy use increases is typically driven in large part by the daily temperatures and weather patterns involved. Please be mindful of this and visit our website at [remc.com](http://remc.com) to track your daily usage, discover ways to conserve energy and also to find the local assistance programs available in your community.

## SWAP SHOP

Rutherford Electric Membership Corporation provides Swap Shop ads as a free service to its members. Guidelines are as follows: Ads are published first-come, first-served. When the space allotted for ads each month is full, remaining ads will be held over for the next issue. Ads will not be run more than once unless re-submitted. Commercial ads will not be accepted. We reserve the right to edit, condense or deny publication of any advertisement. Rutherford Electric Membership Corp. assumes no responsibility for the content of any advertisement and does not endorse or warrant any of the goods so advertised. Please include your account number with your ad.

### Mail your ads to:

## WANTED

**Brother embroidery sewing machine** in working condition. 828-289-3905.

**Someone with a track hoe** to dig a small frog pond, approximately 10' wide x 4' deep. 828-863-2149.

## DAYLIGHT SAVING TIME REMINDER

Don't forget to spring  
forward on March 14!  
Set your clocks  
forward by  
one hour.

## Energy Efficiency Tip of the Month

Don't keep your refrigerator too cold. The Department of Energy recommends a temperature setting of 35 to 38 degrees for the fresh food compartment and 0 degrees for the freezer. Make sure the refrigerator doors are sealed airtight to maximize efficiency.

## Rutherford EMC's Statement of Nondiscrimination

Rutherford Electric  
Membership Corporation  
is an equal opportunity  
provider and employer.

# Where Did These Folks Go?

## Rutherford EMC Has a Capital Credit Check for Them

In November 2017, a general retirement of capital credits was made to members who received service during 1997 and a portion of 1998. Capital credits represent revenues that are retained by your Cooperative for the financing of operations and construction to reduce borrowing and to keep rates low. These credits are returned to you as the financial condition of the Cooperative allows.

Unclaimed capital credit checks are held for four years before the money is escheated\* to the state. If you see your name listed on these pages we are holding a

check for you from 2017.

If the member is deceased, a family member or legal representative of the estate should make application for this check and the full amount of capital credited to that person's account. Last names beginning with (A – portion of L) are listed in this newsletter. The remaining names (portion of L – Z) will be printed in the April issue. All towns listed are located in North Carolina unless otherwise printed.

*\*The reversion of property to the state due to returned mailings with no forwarding information.*
