Owned By Those We Serve

March 2022

Middle Schoolers, Apply Now for a Touchstone Energy Sports Camp Scholarship! Deadline is March 31st!

The clock is still ticking, but the buzzer is about to sound! Rutherford EMC is currently accepting applications for full scholarships to basketball camps at two North Carolina universities this summer. Middle school boys can apply for a scholarship to attend the Carolina Basketball School at the University of North Carolina at Chapel Hill, and middle school girls can apply for a spot at the Wolfpack Women's Basketball Camp held at North Carolina State University in Raleigh. These camps will take place in June of 2022.

Scholarship winners will receive an all-expenses paid trip to camp where they will experience life on a college campus, train with college coaches and athletes, and develop skills to help them excel on and off the court. Applicants must have permission from a parent or guardian to apply and must provide their own transportation to and from camp if selected.

To apply, students must be either a rising sixth- or seventh-grade student. Applicants will be judged on their academics, extracurricular activities and an essay. Applications must be postmarked by March 31, with winners expected to be announced by the beginning of May. Hustle up and get those applications in before the buzzer sounds and you find yourself sitting on the bench! To learn more and apply, visit remc.com or ncrelectriccooperatives.com/sports-camps.

Surge Protection Tips

A power surge is an unexpected increase in voltage, and it can occur from a variety of sources. Regardless of the cause, power surges can cause major damage to electronic devices and equipment in your home.

Let's take a look at common causes of power surges and how you can protect your sensitive electronics.

One of the most common causes of a power surge is lightning. Most of us have experienced this during a severe thunderstorm. When lightning strikes an electrical system, the excess current must be channeled somewhere—unfortunately in many cases, it's sent through a home. Your best bet is to unplug all unused devices and electronics during severe thunderstorms.

Another common cause of power surges is electrical overload. This happens when devices or appliances are plugged into an outlet that can't handle the required amount of voltage, or if multiple devices are plugged into one outlet through an extension cord. If you're experiencing power surges due to electrical overload, it's time to call a qualified electrician to evaluate your home's circuits and electrical needs.

Faulty wiring in a home can also cause power surges. Damaged or exposed wires can cause spikes in voltage, creating a potentially dangerous situation. If you notice signs of faulty wiring, like visible burns on outlets, buzzing sounds from outlets or frequently tripped circuit breakers, your home may be due for

electrical wiring repairs and updates.

Aside from unplugging devices when you suspect a power surge, there are two ways you can take additional precautions to protect electronics in your home.

Point-of-use surge protection devices, like power strips, can protect electronics during most surges. But remember, not all power strips include surge protection, so read the packaging label carefully before you buy, and don't overload the power strip with too many devices. You can also install specialized electrical outlets that offer additional surge protection. Talk to a trusted electrician to learn more.

Another option is a whole-home surge protector, which can help protect your home from larger, more powerful surges. In most cases, whole-home suppressors are connected to your home's service panel and include notification capabilities that indicate a device has been impacted by a surge. Whole-home suppressors should only be connected by a licensed electrician, so consider the cost of installation as well.

Occasional power surges are inevitable, but by unplugging devices when you think a surge may occur and using additional levels of protection like power strips or whole-home suppressors, you can better safeguard your sensitive electronics and devices.

12 – 16 ft. box enclosed cargo trailer, looks not important. 704-675-1590 or 980-888-4258.

Gaston Tech class ring from 1963 – 1964. 828-448-0991.

Collector paying cash for old comic books and toys. 704-616-6567.

Energy Efficiency Tip of the Month

When was your cooling system last serviced? Most manufacturers recommend an annual tune up for your home's cooling system. March is a great time to schedule this service so you can beat the summer rush when the pros are busiest.

A qualified professional can check the amount of refrigerant, accuracy of the thermostat, condition of belts and motors and other factors that can impact the efficiency of your system.

Source: Dept. of Energy

Where Did These Folks Go?

Rutherford EMC Has a Capital Credit Check for Them

In November 2018, a general retirement of capital credits was made to members who received service during 1998 and 1999. Capital credits represent revenues that are retained by your Cooperative for the financing of operations and construction to reduce borrowing and to keep rates low. These credits are returned to you as the financial condition of the Cooperative allows.

Unclaimed capital credit checks are held for four years before the money is escheated* to the state. If you see your name listed on these pages we are holding a check for you from 2018.

If the member is deceased, a family member or legal representative of the estate should make application for this check and the full amount of capital credited to that person's account. Last names beginning with (A- portion of M) are listed in this newsletter. The remaining names (portion of M-Z) will be printed in the April issue. A list of all names is currently available on our website at remc.com. All towns listed are located in North Carolina unless printed otherwise.

*The reversion of property to the state due to returned mailings with no forwarding information.
