## The People Behind Your Power

### Lineworker Appreciation Day is April 11

You've likely noticed Rutherford EMC's crews out and about, working on power lines and other electrical equipment in our community. It's no secret that a lineworker's job is tough—but it's a job that's essential and must be done, often in challenging conditions. This month, as we celebrate Lineworker Appreciation Day on April 11, I thought I'd share some interesting facts about electric lineworkers with you.

The work can be heavy, in more ways than one. Did you know the equipment and tools that a lineworker carries while climbing a utility pole can weigh up to 50 pounds? That's the same as carrying six gallons of water. Speaking of utility poles, lineworkers are required to climb poles ranging anywhere from 30 to 120 feet tall. Needless to say, if you have a fear of heights, this likely isn't the career path for you.

Lineworkers must be committed to their career—because it's not just a job, it's a lifestyle. The long hours and ever-present danger can truly take a toll. In fact, being a lineworker is listed in the top 10 most dangerous jobs in the U.S.

Lineworkers often work non-traditional hours, outdoors in difficult conditions. While the job does not require a college degree, it does require technical skills, years of training and hands-on learning. Did you know that to become a journeyman lineworker can take more than 7,000 hours of training (or about four years)? That's because working with high-voltage equipment requires specialized skills, experience and an ongoing mental toughness. Shortcuts are not an option, and there is no room for error in this line of work.

Despite the many challenges, Rutherford EMC's lineworkers are committed to powering our local community. During severe weather events that bring major power outages, lineworkers are among the first ones called. They must be ready to leave the comfort of their home and families unexpectedly, and they don't return until the job is done, often days later. That's why the lineworker's family is also dedicated to service. They understand the importance of the job to the community.

Nationwide, there are approximately 120,000 electric lineworkers. Here at Rutherford EMC our lineworkers step up to the task and accept the responsibility with pride while striving to keep the power flowing 24/7, 365 days a year. To do this, they maintain over 7,500 miles of power lines across portions of ten counties. In addition to the highly visible tasks lineworkers perform, their job today goes far beyond climbing utility poles to repair a wire. Today's lineworkers are information experts who can pinpoint power outages from miles away. Line crews now use laptops, tablets, drones and other technologies to map outages, survey damage and troubleshoot problems.

Being a lineworker may not seem like a glamorous job, but it is absolutely essential to the life of our community. Without the exceptional dedication and commitment of these hardworking men and women, we simply would not have the reliable electricity that we need for everyday life.

So, the next time you see one of Rutherford EMC's lineworkers out in the community, please thank them for the work they do to keep power flowing, regardless of the time of day or weather conditions. After all, lineworkers are the people behind your power. Please join us as we recognize them on April 11, and follow "#ThankALineworker" on social media to see how others are recognizing lineworkers.

# Educators, It's Bright Ideas Grant Time!

We are happy to announce - it's that time again! Rutherford EMC kicks off its Bright Ideas Education Grant program and begins accepting applications from innovative educators for the 2022-2023 school year on April 1. Teachers with ideas for creative classroom projects that bring learning to life and enhance student success can apply for grants of up to \$1,000. Learn more about this great opportunity and apply online at [ncbrightideas.com](http://ncbrightideas.com).

Grants are available for projects across all grade levels and subject areas, and educators can apply for grant funding individually or as a team. Over the past few years, the program has supported educators as they have had to seek out new ways to engage their students in modified classroom environments. Rutherford EMC has proudly continued to provide these grant resources to facilitate these innovative and adaptive ways of learning.

Applications are only being accepted online and you have until September 15, 2022, to get them submitted. As an added incentive to apply early, educators who submit their applications by August 15 will be entered into a drawing to receive one of five Visa gift cards to be given away statewide.

Since 1994, electric cooperatives in North Carolina, including Rutherford EMC, have partnered with K-12 teachers statewide to provide Bright Ideas

grants for unique classroom projects that would not otherwise be funded. Over the program's history, more than 2.8 million students across North Carolina have benefited from more than 13,500 Bright Ideas funded projects totaling more than \$14.3 million.

The Bright Ideas grant program exemplifies our continued commitment to building a brighter future for the people, businesses and communities we serve. In addition to ensuring the delivery of reliable, affordable and sustainable power, this vision emphasizes the importance of innovation and ongoing community support by benefitting our local educators and students. Learn more at [remc.com](http://remc.com) or [ncelectriccooperatives.com/brighter](http://ncelectriccooperatives.com/brighter).

# Know What's Below: Steps for Safe Digging

**Know what's below.  
Call before you dig.**

Spring is just around the corner, and there's never been a better time to get outside and enjoy the fresh air. Perhaps you're making plans for a new garden or a lawn makeover. However you're planning to revamp your backyard oasis, remember to keep safety in mind for all projects—especially those that require digging near underground utility lines.

Most of us never think about the electric, gas, water and other utility lines buried below the ground, but hitting one of these lines while digging is not the reminder you'll want—trust us! Rutherford EMC reminds all members who are planning a digging project to call 811 at least three business days before you start. Or you can submit a request online by visiting [call811.com/811-In-Your-State](http://call811.com/811-In-Your-State). Here's how the process works:

After you call 811 or submit your request online, all affected utilities will be notified of your intent to dig. It may take the utilities a few days to

get to your request, so please be patient. The affected utilities will send someone out to mark the buried lines with paint or flags. Before you break ground, confirm that all the utilities have responded to your request. If you placed your request by phone, use the process explained by your 811 call center representative. If you submitted your request online, refer to your 811 center ticket to confirm everything.

By taking this important step before you break ground on your project, you can help protect not only yourself but our community. Disrupting an underground utility line can interrupt service, cause injuries and cost money to repair, so remember to call 811 first and know what's below.

**Digging into  
an Outdoor  
Project?**

Before you dig, dial 811 or visit [www.call811.com](http://www.call811.com) to protect underground utilities. Careless digging poses a threat to people, electric lines and other underground facilities. Contact 811 first and help keep our community safe.

## Energy Efficiency Tip of the Month

When streaming content, use the smallest device that makes sense for the number of people watching. Avoid streaming on game consoles, which use 10 times more power than streaming through a tablet or laptop.

Streaming content with electronic equipment that has earned the ENERGY STAR® rating will use 25% to 30% less energy than standard equipment.

# Where Did These Folks Go?

## Rutherford EMC Has a Capital Credit Check for Them

In November 2018, a general retirement of capital credits was made to members who received service during 1998 and 1999. Capital credits represent revenues that are retained by your Cooperative for the financing of operations and construction to reduce borrowing and to keep rates low. These credits are returned to you as the financial condition of the Cooperative allows.

Unclaimed capital credit checks are held for four years before the money is escheated\* to the state. If you see your name listed on these pages we are holding a check for you from 2018.

If the member is deceased, a family member or legal representative of the estate should make application for this check and the full amount of capital credited to that person's account. Last names beginning with (portion of M-Z) are listed in this newsletter.

**A list of all names is currently available on our website at [www.remc.com](http://www.remc.com).** All towns listed are located in North Carolina unless printed otherwise.

*\*The reversion of property to the state due to returned mailings with no forwarding information.*
